This is my plea for banning Glyphosate as a chemical to be used at ANY level of concentration, resulting in the poisoning of our food and water, and causing cancer in humans.

My husband is suffering from non-alcoholic liver disease. The doctors have been stumped, until one doctor said that Glyphosate poisoning is likely the cause.

We cannot take the chance that ANY level of Glyphosate is safe to ingest, since it multiplies in concentration with each level in the food chain, and with each item that is eaten in a normal meal.

Please fight Monsanto and others who would mask the truth in favor of their profits. They would rather cause cancer than lose any money.

KEEP GLYPHOSATE ON THE CARCINOGEN LIST AND BAN ALL CONCENTRATIONS FROM BEING LISTED AS "SAFE"!!

Thank you for your time

W. McFarland
